Dijedon Tahiri

AI-FIRST PRODUCT ENGINEER

Full-stack software / Product design / Applied AI

Tetovo, North Macedonia | CET / CEST | Open to remote roles & contracts
dijedontahiri1@gmail.com | dijedon.dev | linkedin.com/in/dijedontahiri

PROFESSIONAL SUMMARY

Product engineer building client software and independent products since 2022. Use Codex and Claude Code for all implementation, while personally owning product definition, UI/UX, architecture, integrations, review, testing, hosting and release. Experience spans web and mobile SaaS, eSIM commerce, invoicing, government workflows and AI voice products.

PROFESSIONAL EXPERIENCE

Full-Stack Product Engineer

Independent contracts / Upwork / Direct clients — Jan 2022 - Present

- Deliver client software for North Macedonia, Switzerland and EU markets, from requirements and design research through implementation, integration, deployment and hosting.
- Translate business workflows into data models, role-based access, admin dashboards, payments and notifications. Selected client work includes Faturio, Avtomarket.mk, E-Inspector and Trilon.

AI Product Builder

Getaurra AI Front Desk — 2026 | Discontinued

- Built and launched an AI front-desk product for service businesses: phone answering, a website voice widget, lead capture, call summaries, booking support, handoffs and follow-ups.
- Integrated ElevenLabs, OpenAI and Claude APIs with Laravel, Next.js and TypeScript, plus telephony and CRM/calendar workflows.
- Awarded **approximately $4,000 in ElevenLabs grant credits** for voice-agent development. The product was later discontinued.

Founder & Full-Stack Product Engineer

SimUno eSIM Ltd — 2026 | Discontinued

- Built and launched a travel eSIM marketplace covering **190+ countries** across **web, iOS and Android**; owned product strategy, design, architecture, infrastructure, pricing and launch.
- Delivered the Laravel backend, B2B reseller portal, partner pricing, Stripe payments, onboarding and eSIM provisioning; published apps to the Apple App Store and Google Play.
- Generated **approximately $500** in revenue and signed **2 B2B partners** in the first two months, without advertising spend. The venture was later discontinued.

HOW I BUILD WITH AI

Define & research. Clarify the problem, study design references, map roles and workflows, and choose the stack and services around product needs.

Direct the build. Break implementation into scoped tasks for Codex and Claude Code, with clear behavior, constraints and acceptance criteria.

Review & validate. Check generated changes against the intended system; test real user flows, integrations and edge cases rather than accepting output blindly.

Ship & iterate. Handle hosting and deployment, verify the live experience, and improve the product through repeated testing and refinement.

DIJEDON TAHIRI / AI-FIRST PRODUCT ENGINEER

SELECTED CLIENT PROJECTS

Avtomarket.mk | Vehicle marketplace 2024 - 2026

Mobile / Web App Builder

Built vehicle listings, advanced search filters, seller dashboards, listing creation and payment flows. Supported mobile releases to Google Play and the Apple App Store.

Faturio | Swiss invoicing platform 2025

System Architect & Full-Stack Developer

Built Swiss QR-Bill invoicing, financial reporting, multilingual interfaces and financial workflow automation for SMEs. Stack: React, Node.js, Express.js and MySQL.

E-Inspector | Municipal inspection system 2024

Frontend Developer

Developed React interfaces for municipal inspection workflows, real-time case tracking, citizen reports and operational dashboards. Project stack: React, Node.js, MySQL and Tailwind CSS.

Trilon | Rent-a-car SaaS 2023

Full-Stack Developer

Built fleet management, reservations, invoicing and payment tracking for **50+ vehicles**; booking automation reduced manual booking errors by **40%**. Stack: PHP, React, MySQL and REST APIs.

TECHNICAL SKILLS

AI development: Codex, Claude Code, prompt engineering, AI-directed implementation and validation

Web & mobile: TypeScript, JavaScript, React, Next.js, React Native, HTML, CSS, Tailwind CSS, Framer Motion

Backend & data: PHP, Laravel, Node.js, Express.js, SQL, MySQL, Prisma, REST APIs, authentication, role-based access control (RBAC)

Applied AI & integrations: OpenAI API, Claude API, ElevenLabs, voice agents, Stripe, CRM/calendar workflows, WhatsApp and email automation

Design & delivery: Figma, responsive UI/UX, system design, Git, GitHub, Vercel, Railway, hosting, Apple App Store and Google Play releases

Stack-adaptable: evaluate unfamiliar tools against requirements and integration constraints, rather than forcing every product into one framework.

ADDITIONAL EXPERIENCE

Teaching Assistant

Digital School Macedonia | Tetovo Sep 2022 - Jan 2025

Taught HTML, CSS and web fundamentals through hands-on projects; supported debugging, lesson planning, student evaluation and progress tracking across multiple cohorts.

EDUCATION & LANGUAGES

High School Diploma, Natural Sciences & Mathematics

Yahya Kemal College | Tetovo, North Macedonia | 2020 - 2024

Languages: English - Native / Bilingual; Albanian - Native / Bilingual; Macedonian - Conversational.

WORKING STYLE

Naturally introverted, creative and execution-focused. Prefer focused work, clear requirements and purposeful communication. Keep experimenting with new AI tools and product ideas, while staying accountable for what ships.
